FULL STACK DEVELOPER

Software engineer fluent in Ruby on Rails and JavaScript/React.js based programming. Adept at learning new technologies. With over twenty years of experience working in analytic philosophy and formal logic, I have strengths in analysis, problem solving, research, communication, and process optimization that help businesses deliver truly excellent and meaningful products.

TECHNICAL SKILLS

Ruby/Ruby on Rails, Javascript/React.js, HTML, CSS/Tailwind, Active Record, SQL, Action Cable, Git/Github, Auth0, Turbo, Stimulus

TECHNICAL PROJECTS

Tunnel Brawl! Chess Variant - [Github](#) | [Demo](#)

A two to four player variant of chess based on the game Bosworth.

- Implemented Action Cable to handle websockets, allowing synchronous play from different clients
- Built a fully RESTful API with Ruby on Rails, integrating authorization and validation to handle complex move logic
- Designed a user-friendly frontend with React for modularity, styled with CSS

GameNight Event Planner - [Github](#) | [Demo](#)

An application to help plan group events.

- Built an efficient backend to handle HTTP requests and object relational mapping with Rails and Active Record
- Designed a dynamic frontend with client-side routing and user-login using React
- Incorporated friend request/friending functionality built from scratch using the relational database

Cadence BPM App - Github: [Frontend](#) / [Backend](#)

An app that utilizes the Spotify API to determine the BPM of a song.

- Interfaced with the Spotify API to allow users to search for songs
- Parsed and displayed Spotify API responses to display information clearly
- Stored Spotify API responses with a Rails backend to allow users to search for songs by BPM
- Designed a visually-pleasing, modern frontend with React, styled with Tailwind CSS

EXPERIENCE

Social Assurance

Software Engineer, fullstack

Lincoln, NE
July 2023 - Present

- Built new SaaS features at a dynamic startup
- Maintained a robust codebase built by numerous contributors over the years
- Flourished in an Agile work environment

University of North Alabama

Professor of Philosophy

Florence, Alabama
August 2016 - May 2023

- Engaged over 180 students from a wide variety of backgrounds each semester
- Applied over 20 years of training and practice in research, analysis, and logic to maintain an active research program
- Led committees of my peers, including the university research ethics committee, to analyze and solve complex problems facing the university community
- Maintained departmental websites

EDUCATION

Flatiron School

Fullstack Software Engineering, Ruby on Rails and JavaScript/React.js curriculum

April 2023

University of Nebraska - Lincoln

Doctorate, Philosophy

May 2015

Masters, Philosophy

May 2010

State University of New York - Geneseo

Bachelors, Philosophy

May 2004
