Full Stack Software Engineer with over three years of professional experience building and maintaining SaaS applications using Ruby on Rails, React, TypeScript, and JavaScript. Experienced delivering software across the full development lifecycle, from product planning through deployment and production support. Particularly interested in backend systems, platform engineering, application architecture, and AI-assisted software development. Combines a background in software engineering and higher education to bring strong analytical reasoning, communication, and collaborative problem solving to technical teams.

Professional Experience

Social Assurance - Software Developer

July 2023 – Present

- Develop and maintain a multi-tenant SaaS platform serving education, financial, and government customers using Ruby on Rails, React, TypeScript, JavaScript, and SQL while contributing across backend services, frontend applications, and API integrations.
- Contributed to a company-wide migration from legacy frontend architecture to React and TypeScript, helping establish implementation patterns for the new platform.
- Designed and implemented a new Canva integration from the ground up, connecting the platform with third-party services to streamline customer workflows.
- Partner closely with Product, QA, leadership, and other developers throughout planning, implementation, testing, deployment, and ongoing product support.
- Designed and implemented a comprehensive task management system supporting assignment tracking, collaboration, and workflow management across the platform
- Review pull requests and collaborate with teammates to improve code quality, maintainability, and engineering consistency.
- Adopted AI-assisted development workflows to accelerate implementation while maintaining engineering judgment, code quality, and architectural consistency.
- Contribute to application architecture, engineering standards, and application security initiatives beyond day-to-day feature development.
- Mentored teammates through code reviews, technical discussions, and knowledge sharing across the engineering team.

University of North Alabama - Associate Professor of Philosophy

August 2016 - May 2023

- Taught undergraduate courses in ethics, logic, political philosophy, philosophy of mind, and the history of philosophy.
- Designed courses and curricula emphasizing analytical reasoning, structured problem solving, and clear communication.
- Served on and chaired university committees and contributed to departmental planning and governance.
- Mentored students through advising, independent research, and career preparation.

Technical Skills

Languages

Ruby • TypeScript • JavaScript • SQL

Frameworks

Ruby on Rails • React • Redux • Node.js

Cloud & DevOps

RESTful APIs • AWS • GitHub • GitHub Actions • RESTful APIs

Engineering Practices

AI-assisted development (GitHub Copilot, Claude Code) • Code Review • CI/CD • Agile • Test-driven development

Education

Ph.D., Philosophy

University of Lincoln - Nebraska

M.A., Philosophy

University of Lincoln - Nebraska

B.A., Philosophy

SUNY Geneseo
